

Take security into **your** hands.

nG SecurePhone Desktop

Tap-protected calls, even with desktop PC

About nG SecurePhone

Desktop

The comfortable desktop application nG SecurePhone Desktop enables secure phone calls directly from the desktop PC. It is the ideal office extension for all users of a mobile nG Security solution, e.g. the nG SecurePhone.

You can answer incoming secure calls conveniently on your PC while in the office, while on the road you use the Secure Phone. Since only one user account is required you stay reachable wherever you are.

The nG SecurePhone Desktop protects your calls with the best and most secure techniques (AES 256Bit & Diffie-Hellman) against all kind of tapping scenarios. Additional to the high security standards the solution stands out for excellent quality of service and easy handling.

Ready for immediate use

The user-friendly USB-Phone is easily installed and allows the immediate use of the nG SecurePhone Desktop.

The Phone is independent from the PC sound-card and can be connected via any USB-Port. No external power supply is needed.

The volume can be adjusted even within a call, furthermore the phone offers speed calling, microphone muting and different ring tones.

Cross-network Security

The nG SecurePhone Desktop is of course fully compatible with all other nG Security solutions and systems. It therefore enables secure calls even between different networks, e.g. between desktop and mobile.
